Research reference board

Real captures, studied for principle. Each card states the source, what works, what HolyPearls borrows and what it must not copy. No identity, composition, copy or proprietary motif is reproduced on the anchors.

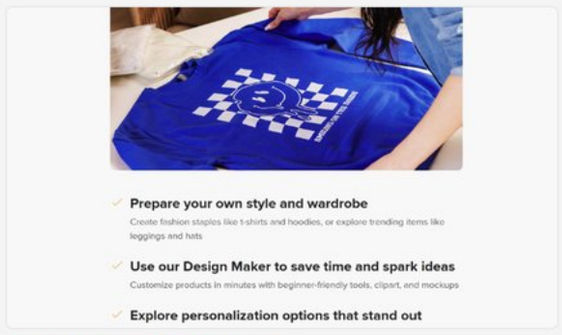

01 PRODUCT / MATERIAL MERCHANDISING

MOO — Business Cards (moo.com/us/business-cards)

WHAT WORKS
Paper and finish are shown as the decision itself; tactile crops at real scale.

BORROW
Material-first imagery for Business Cards; per-card value beside the total.

DO NOT COPY
MOO green, logo, card compositions, copy.

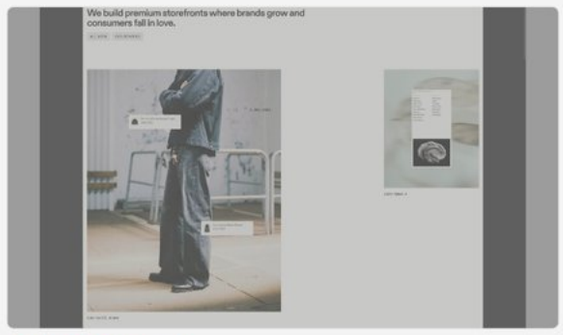

02 PRODUCTION / PROCESS PHOTOGRAPHY

Printful — support & process imagery (printful.com)

WHAT WORKS
Hands and equipment in frame make fulfilment believable.

BORROW
Hands-at-work framing and the production ticket caption.

DO NOT COPY
Stock-feeling models; implying HolyPearls owns equipment it doesn't.

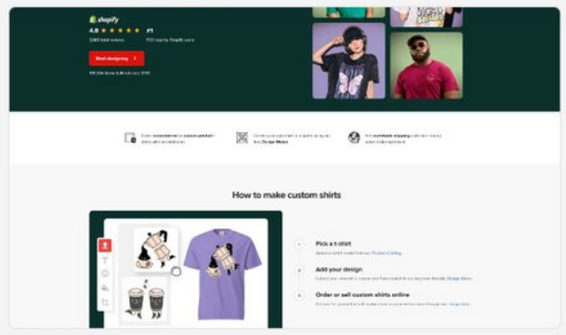

03 EDITORIAL COMMERCE

Aino Agency — Mobbin section 27dc50fa

WHAT WORKS
Oversized type against a single strong image; generous rhythm.

BORROW
Scale contrast between Display XL and one production image per section.

DO NOT COPY
Agency identity, portfolio abstraction, hidden commerce.

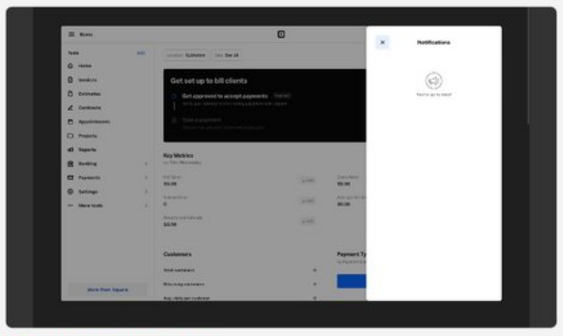

04 PRODUCT CONFIGURATION

Printful — Make your own shirt

WHAT WORKS
Pick → customise → order is legible in one glance; preview beside steps.

BORROW
Preview-dominant configurator with preset placements.

DO NOT COPY
Full design-maker tooling, layers, free text.

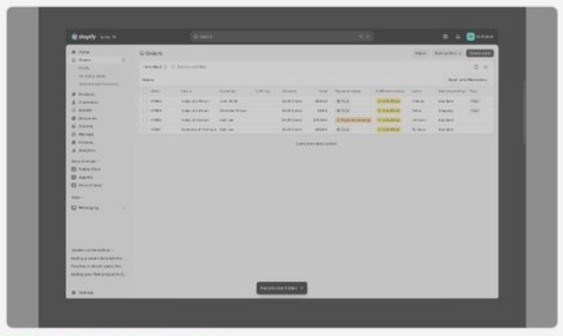

05 TRANSACTIONAL CLARITY

Square — Mobbin workspace 626b945b

WHAT WORKS
Money states are big, calm and labelled; attention is separated.

BORROW
Total/deposit/balance hierarchy; attention before detail.

DO NOT COPY
Square layout, colour and chrome.

06 WORKSPACE / B2B UTILITY

Shopify admin — Mobbin workspace ed22dc70

WHAT WORKS
Utility density without decoration; status in-row.

BORROW
Needs Attention first; five-column tables, not 40.

DO NOT COPY
Admin chrome, SaaS grey/blue palette.

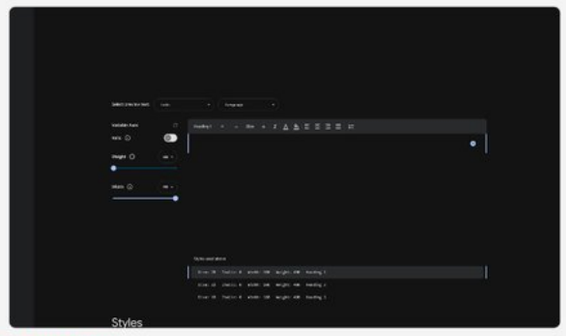

07 MOTION / INTERACTION

Studio Freight — Mobbin section c88d7a4b

WHAT WORKS
Controlled graphic rhythm; media revealed in sequence.

BORROW
Directional reveal (Production Reveal) on hero + process only.

DO NOT COPY
Scroll-jacking, heavy WebGL, agency showmanship.

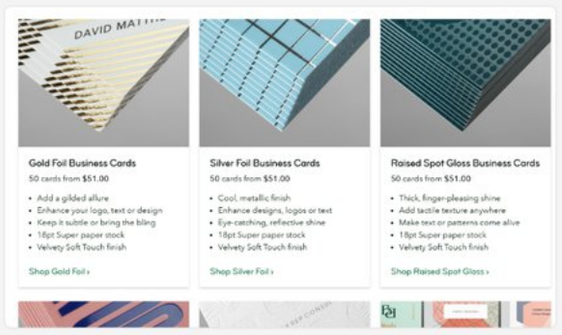

08 TYPOGRAPHY

Google Fonts — Geist

WHAT WORKS
Neutral, legible grotesk with real weight range for UI.

BORROW
Geist as the UI family, 400–700.

DO NOT COPY
Ultralight weights; condensed faces for reading.

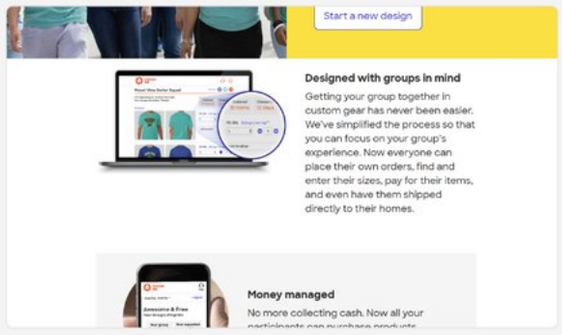

09 COLOR / MATERIAL PALETTE

MOO — Special finishes

WHAT WORKS
Finish colour lives in the material photograph, not the UI.

BORROW
Neutral UI; colour carried by product, thread and ink.

DO NOT COPY
Metallic gradients, per-category colour coding.

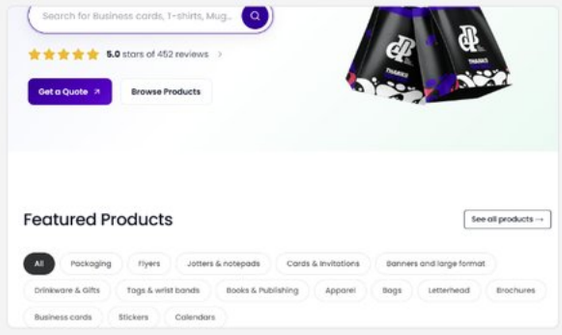

10 GROUP ORDERS (B2B)

Custom Ink — Group orders

WHAT WORKS
Group collection explained as a people problem first.

BORROW
Participant flow language: 'everyone picks their own size'.

DO NOT COPY
Mass-market playfulness, yellow panels, Design Lab.

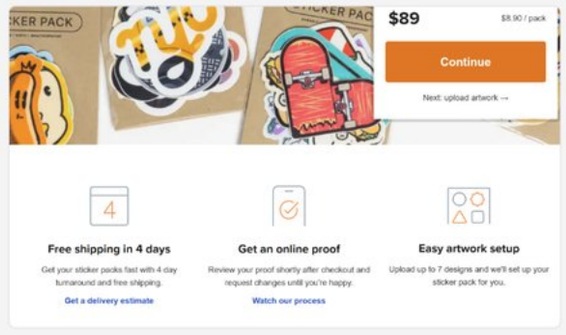

11 DO-NOT-COPY / ANTI-PATTERNS

Local print-shop pattern (Lagos market capture)

WHAT WORKS
Shows the category default HolyPearls must escape.

BORROW
Nothing visual — only the lesson: fewer claims, more proof.

DO NOT COPY
Purple gradients, star-rating clutter, 3D mock-ups, 'handled under one roof' copy.

12 ANTI-PATTERN — PRICE WALLS

Sticker Mule — quantity table

WHAT WORKS
Clear tiers — but loud urgency and colour fight each other.

BORROW
Tier table with one highlighted row and plain savings.

DO NOT COPY
Orange urgency buttons, review-star noise.

MOBBIN LINKS FROM RESEARCH §36 — PRINCIPLES EXTRACTED (screen images did not render in the embedded browser; see blockers)

Aino	mobbin.com/sites/sections/27dc50fa…	Type/image scale contrast	→ 15, 23

Art direction synthesis

REVISED IN CORRECTION PASS. The Production Studio evolves into an Editorial Production House: a physical production company with unusually strong taste. Expression drops as intent becomes transactional — editorial on the homepage, Our Work and Production Studio; moderate on categories and PDP storytelling; restrained in buying areas and the configurator; disciplined in quotes, payments, proofs, tracking and Workspace.

PRIMARY TERRITORY · FOUNDATION

Editorial Production House

Paper-white pages broken by full Ink sections and one dominant photograph at a time. Tight Geist 600 headlines over Geist decisions. Production metadata (job, proof, quantity) as the graphic language. One signal-red action colour.

NEUTRAL · CAPABLE · FRIENDLY · PREMIUM · MATERIAL · EDITORIAL · CLEAR · PRODUCTION-LED

CONTRAST STUDY A · CONTROLLED ENERGY

04 Graphic Print Lab

Marigold registration rules, mono production tickets, display numerals in editorial lists. Used for: SMBD, production evidence, editorial interrupts, image tickets. Never for forms, prices or states.

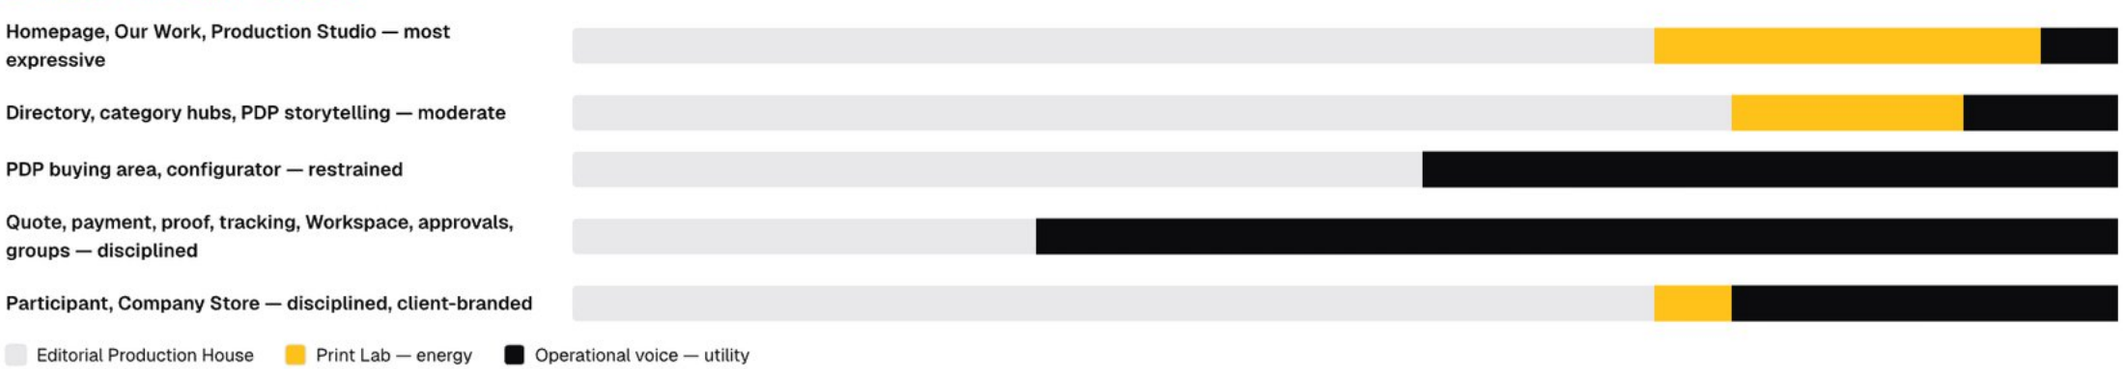

CONTRAST STUDY B · UTILITY MODE

Refined B2B Studio

Geist at UI weights only — no display tracking. 32px headings, five-column tables, status chips, marigold only for 'you need to act'. Photography survives in templates and store products.

Approve badge Proof V2	Awaiting
Kitchen Aprons · Lekki	Ready to dispatch

SYNTHESIS — WHERE EACH MODE LIVES

Colour system

PROVISIONAL UNTIL REAL BRAND IDENTITY INPUT. Eleven working colours on a cool, neutral base — no warm undertone. Contrast is measured against White #FFFFFF and Bone #F4F4F5.

SURFACE PROPORTIONS · PUBLIC: Paper ≈ 50% of sections · Ink ≈ 25% (immersive storytelling only) · Bone ≈ 15% (quiet/utility bands) · Signal red ≈ 1 closing band. TRANSACTIONAL + WORKSPACE: Paper + Bone only; Ink limited to the Workspace sidebar and payment summary.

Aa 16

Bone — quiet band
`#F4F4F5 · RGB 244, 244, 245`
Quiet sections, category index, B2B band. No longer the page base.

Aa 16

Paper — page base (white)
`#FFFFFF · RGB 255, 255, 255`
Page base on public and transactional pages; cards, inputs, panels. Ink on Paper 19.5:1.

Aa 16

Sand
`#E8E8EA · RGB 232, 232, 234`
Image placeholder, quiet panels, B2B band.

Aa 16

Ink
`#0C0C0E · RGB 12, 12, 14`
Text, full-bleed immersive sections (SMBD, production evidence), Workspace sidebar. Paper on Ink 19.5:1.

Aa 16

Graphite
`#5C5C63 · RGB 92, 92, 99`
Secondary text. 6.63:1 on Paper · 6.03:1 on Bone.

Aa 16

Border
`#E4E4E7 · RGB 228, 228, 231`
1px rules only. Never the sole state cue. Strong: #8A8A93 (3.42:1) for inputs.

Aa 16

Brand Accent — Signal red
`#D2311A · RGB 210, 49, 26`
Primary action, links, focus accents. 5.01:1 on Paper, 4.55:1 on Bone; Paper on it 5.01:1.

Aa 16

Accent Hover
`#B02810 · RGB 176, 40, 16`
Hover/pressed #B02810. Paper on it 6.65:1.

Aa 16

Marigold — energy
`#FFC21A · RGB 255, 194, 26`
Print Lab + 'needs you'. Ink on it 9.34:1. Never for text on light.

Aa 16

Success
`#1E6B4A · RGB 30, 107, 74`
6.45:1 on Paper. Tint #E0EDE5.

Aa 16

Warning
`#8A5A00 · RGB 138, 90, 0`
5.93:1 on Paper. Tint #F7EBCF.

Aa 16

Error
`#B42318 · RGB 180, 35, 24`
6.57:1 on Paper. Tint #F8E0DC.

Aa 16

Info
`#2F5B8A · RGB 47, 91, 138`
7.04:1 on Paper. Tint #E0E8F2.

Light — default

Paper page, Bone quiet bands, Ink text, Signal-red action.

Primary action

Dark — immersive bands + sidebar

Ink surface, Bone text, Marigold accents. Signal-red buttons keep 5.0:1 with Paper text.

Primary action

Energy — Print Lab only

Marigold field, Ink text. Max one band per page.

Primary action

Typography system

PROVISIONAL UNTIL BRAND INPUT · SIGNAL DIRECTION (26 Sep 2026). One family, two jobs: Geist 600 at display sizes with tight tracking is the public voice — hero statements, major H1/H2, section statements; Geist 400–700 carries all UI, forms, prices, tables, Workspace. Geist Mono carries production metadata only.

DISPLAY · Geist 600

Aa Gg 0123

REGULAR 400 · ITALIC 400 · ONE WEIGHT ONLY

Bring your brand into the real world

Why one grotesk: the brand is a physical production house. A neutral, tightly tracked grotesk reads like signage and spec sheets rather than a magazine, keeps the public and transactional surfaces in one voice, and lets photography and the production tickets carry the character.

UI + TEXT · Geist

Aa Gg 0123

WEIGHTS 400 · 500 · 600 · 700

Configure yours — 50 navy polos, left-chest embroidery.

Workhorse grotesk with open apertures. Every label, input, table, button and paragraph. 16px minimum body.

META · Geist Mono

Aa Gg 0123

WEIGHTS 500 · 600

JOB HP-2026-0142 · PROOF V2 · QTY 250

Production metadata only: job refs, proof versions, quantities, dimensions where sourced. ≤ 13px, uppercase, tracked +0.6. Never decoration.

TOKEN	SPECIMEN	DESKTOP	MOBILE	WORKSPACE

Grid + spacing

Desktop 1440 · 56px gutters · 1328px content · 12 columns (80px, 24px gutter). Mobile 390 · 20px gutters · 4 conceptual columns. Workspace: 264px role-aware sidebar + fluid main with 40px padding.

DESKTOP 1440 — 12 × 80 + 11 × 24 = 1328

MOBILE 390 — 20 GUTTERS

WORKSPACE — SIDEBAR 264 + FLUID MAIN

SPACING — 4 → 128

sp-4	icon ↔ text
sp-8	chip padding, tight stacks
sp-12	card internal gaps
sp-16	card grid gap
sp-20	mobile gutter
sp-24	panel padding
sp-32	group gap
sp-40	workspace padding
sp-48	component spacing
sp-64	section inner
sp-80	section rhythm (mobile 48)
sp-96	section rhythm desktop
sp-128	hero breathing room

Shape, border + elevation

Surface, spacing, image and rule do the work — not shadow stacks. Three radii only. One overlay shadow. Borders are 1px cool neutral; interactive borders step up to Line Strong or Ink.

Control · 6px

Buttons, inputs, chips, size tiles

Card · 10px

Cards, table shells, summaries

Panel · 18px

Large panels, board sections, B2B preview

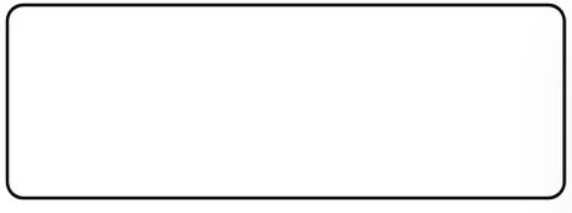

Rule

Line #E4E4E7 · dividers, card edges

Interactive

Line Strong #8A8A93 · input rest (3.42:1)

Selected

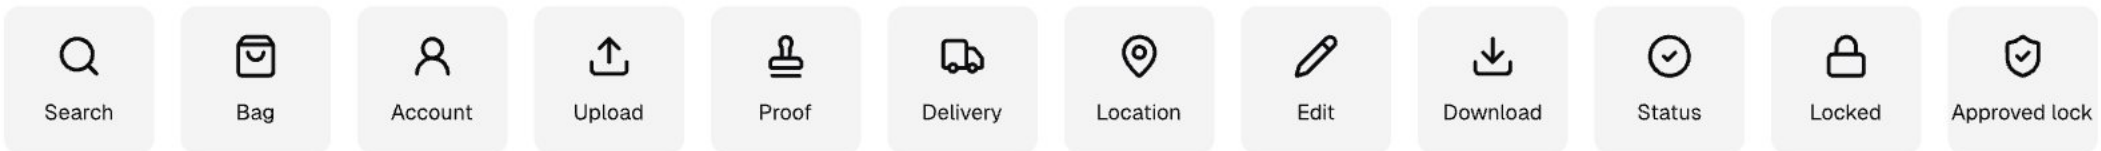

Ink 2px · selected choice, focus base

Overlay shadow

0 18 48 / ink 14% · mega-menu, sheets, dialogs only

Icon direction

Lucide, 1.5–2px line, 16/20/24px. Icons support words; they never replace them on consequential actions. No filled, duotone or illustrative icon packs.

✓ Icon + label for every action that changes money, proofs or orders.

✓ Status = icon + word + colour, never colour alone.

✗ Icon-only primary actions, emoji, mixed icon sets, filled glyphs.

Photography direction

Natural directional light, warm-neutral grade, true material colour, hands and equipment in frame, sharp detail — pushed to detail scale (one dominant image per section, not equal thumbnails). Every image on this board is a GENERATED TEMPORARY REFERENCE: it is never evidence of HolyPearls premises, equipment, staff or clients.

PRODUCT

- ✓ The exact sellable item, true colour, clean ground.
- ✕ Floating 3D mock-ups, fake-perfect folds, colour drift.

PROCESS

- ✓ Real HolyPearls production for confirmed core capabilities (cut-and-sew, large format); finished outcomes for managed methods.
- ✕ Generated machines or rooms presented as HolyPearls' own; equipment for methods not confirmed in-house.

MATERIAL

- ✓ Texture and weight you can almost touch.
- ✕ Over-sharpened macro, tinted fabrics, fake paper grain.

PEOPLE / HANDS

- ✓ Skill and care; real Nigerian operators and customers.
- ✕ Smiling-office stock, posed thumbs-up, AI hands.

ENVIRONMENT

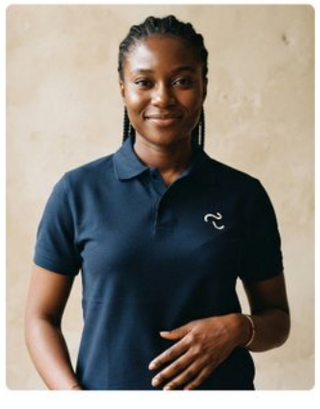

- ✓ An organised, capable, daylit studio.
- ✕ Messy clutter or sterile warehouses; teal/orange grade.

FINAL WORK

- ✓ The brand living in the real world, in use.
- ✕ Implied client work without permission; staged crowds.

CROP SYSTEM — FOUR RATIOS ONLY

4:5

Product + editorial portrait

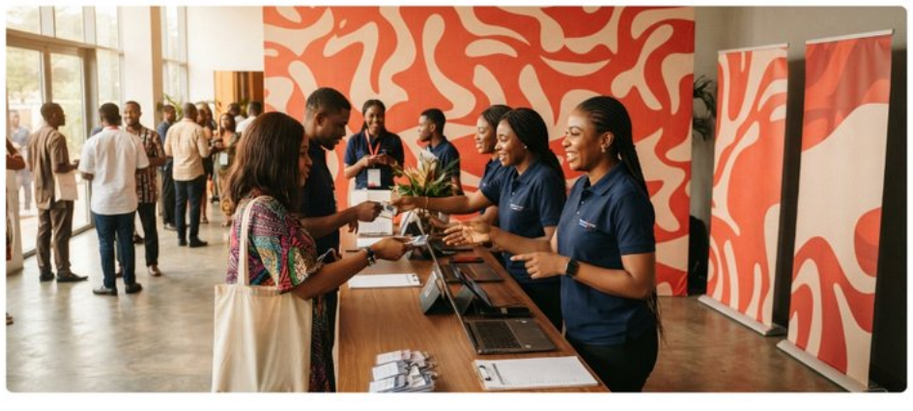

1:1

Catalogue utility, materials

3:2 / 16:10

Process, case study

Wide 21:9

Hero, project moment

Motion system

Motion comes from production behaviour, not floating UI. Three tiers, one easing family, one signature. The site must be complete with motion off.

UTILITY

120–200ms

160ms · ease-out cubic-bezier(.2,.8,.2,1)

Hover, focus ring, dropdown, chip, size tile select, status change

CONTENT

250–450ms

320ms · same curve; exit (.4,0,1,1)

Filter drawer, accordion, product image swap, price update, preview state change, mega-menu

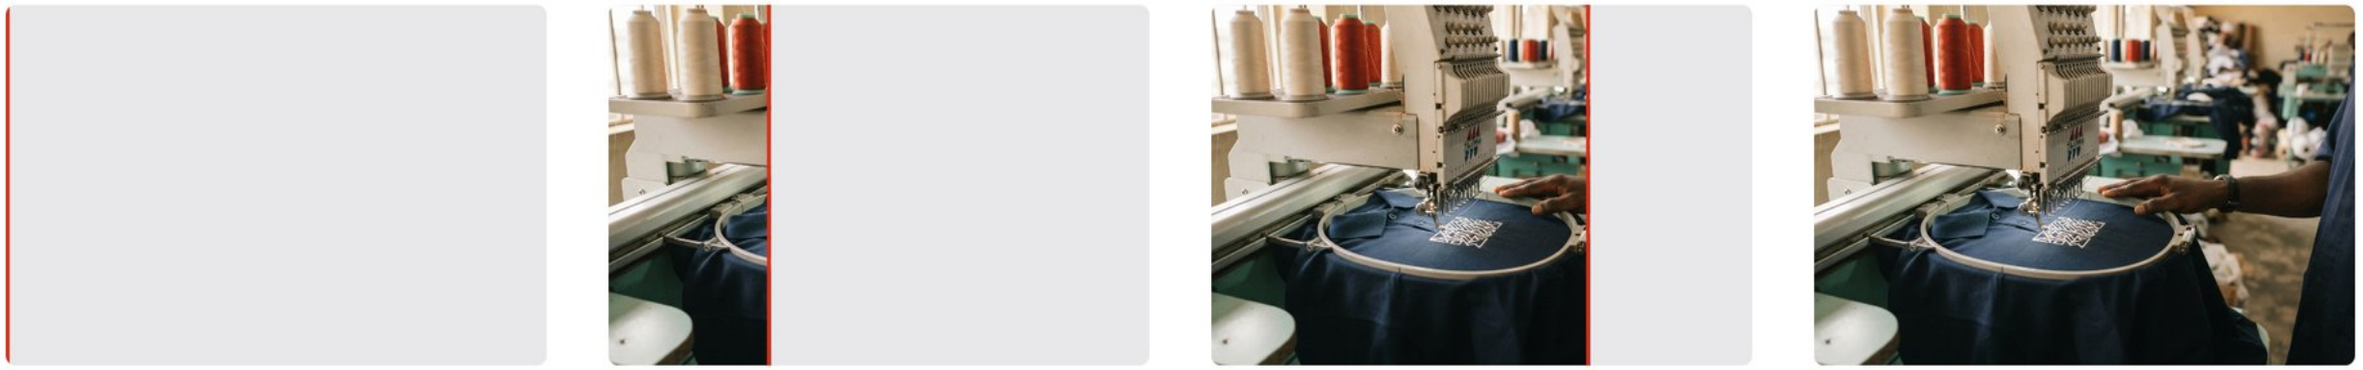

EDITORIAL

500–900ms

650ms section reveal · 900ms Production Reveal

Selected hero, process and editorial media only — never on commerce controls, prices or approvals

SIGNATURE — THE PRODUCTION REVEAL · 900ms · a registration line leads, the media follows behind it, the production metadata arrives last

0ms · 1px vermilion registration line enters

120ms · media reveals L→R behind the line

480ms · production ticket fades in, +6px

900ms · line exits; composition settles

INTERACTION SPECS

Hover	160ms colour/underline; cards lift 0 — image crossfades to detail crop in 280ms
Dropdown / select	160ms fade + 4px drop
Mega-menu	180ms fade + 8px drop; media swaps on column hover (200ms)
Product image swap	280ms crossfade, no zoom
Filter drawer (mobile)	320ms slide up; results update in place, no layout shift
Accordion	250ms height + chevron rotate
Price update	Number rolls 240ms + 'Price updated' chip for 3s
Preview state	200ms crossfade between colour/placement states
Attention / status	Marigold edge fades in 200ms; no pulsing, no shake
Section reveal	650ms 16px rise + fade, once per session

PREFERS-REDUCED-MOTION

- Production Reveal → image shown at rest instantly
- Section reveals → none; content present on load
- Crossfades → 0ms swap; focus ring still animates 0ms
- Price update → chip only, no number roll
- Hero loop video → never loads; poster only

NEVER ANIMATE WITH THE REVEAL

- Forms and configurator controls
- Checkout, quote acceptance, payment
- Proof approval
- Workspace tables and lists
- Scroll-jacking of any kind

Navigation

Restrained top bar, structured mega-menu with one media story, mobile hierarchy with prominent search, and a role-aware Workspace sidebar. Start a Project is always findable but never floats over content.

B2B + project primitives

Workspace is the same brand in a disciplined mode: same type, same surfaces, tighter rhythm. Locks read as 'approved and protected' — a green shield and the approver's name — never as greyed-out, broken controls. Photography stays in templates, assets and store products so the physical world never disappears.

© 2026 HOLYPEARLS · PROVISIONAL

FIRST VIEWPORT (0–844)
Header, headline, intent search and Start a Project all land above the fold. The poster image begins at ~560px so the viewport already shows real production.

WHAT CHANGED
Filmstrip → one poster + 4-frame swipe. Outcome mosaic → horizontal swipe. Category index keeps its numbering but drops sub-copy. SMBD becomes a list with thumbnails. Footer becomes accordions.

WHAT STAYS
All 17 sections in the frozen order. Price-state dots + words. Production tickets. Concept-reference flags on non-client imagery.

STICKY UI
None on the homepage. The header scrolls away and returns on scroll-up; Start a Project lives in the header menu and the hero.

PERFORMANCE
Poster image is the LCP candidate (≤ 2.5s p75). Loop video is optional, Wi-Fi only, and never for reduced-motion users.

Product Directory — desktop

A big catalogue that feels curated, not a marketplace. Density rises deliberately: a feature row, then compact rows, then an editorial interrupt for 'made from scratch'. Filters follow the frozen Stage 3.1B hierarchy. References: Shopify Supply (product-led rhythm), MOO (material clarity), Printful (catalogue breadth).

Everything we make

304 products in eight categories. We can brand any of them, or make it from scratch.

Search products. Try “polo”, “roll-up” or “paper bag”

Polo PDP — mobile

Image first, decision immediately after — no shrunken sidebar. The sticky Configure bar appears once the in-page button scrolls away, carrying the price state so context is never lost.

STRUCTURE

Gallery becomes a full-bleed swipe with position dots; thumbnails removed. Decision block follows directly: name, price state, three fact chips, colour, Configure.

STAYS

Price state words, MOQ, lead time, proof-first promise, route choice, same components.

SIMPLIFIED

Material, process, tiers and FAQ collapse into accordions. Related products move below.

STICKY

HP/Mobile/StickyCTA appears only after the in-page Configure leaves the viewport; it never covers form fields.

Business Cards PDP

Tactile and fast. Paper is the decision, so paper is the imagery. Price is ready, so the whole configuration happens on the page: paper → sides → finish → quantity → artwork → total with per-card value → Add to bag. Reference: MOO (paper and finish as decisions), not MOO's identity.

Request changes

What happens after you accept

Accept + deposit	Proofs	Production + QC	Balance	Install
Deposit due to start	Before production	10–30 working days	Before dispatch	After site review

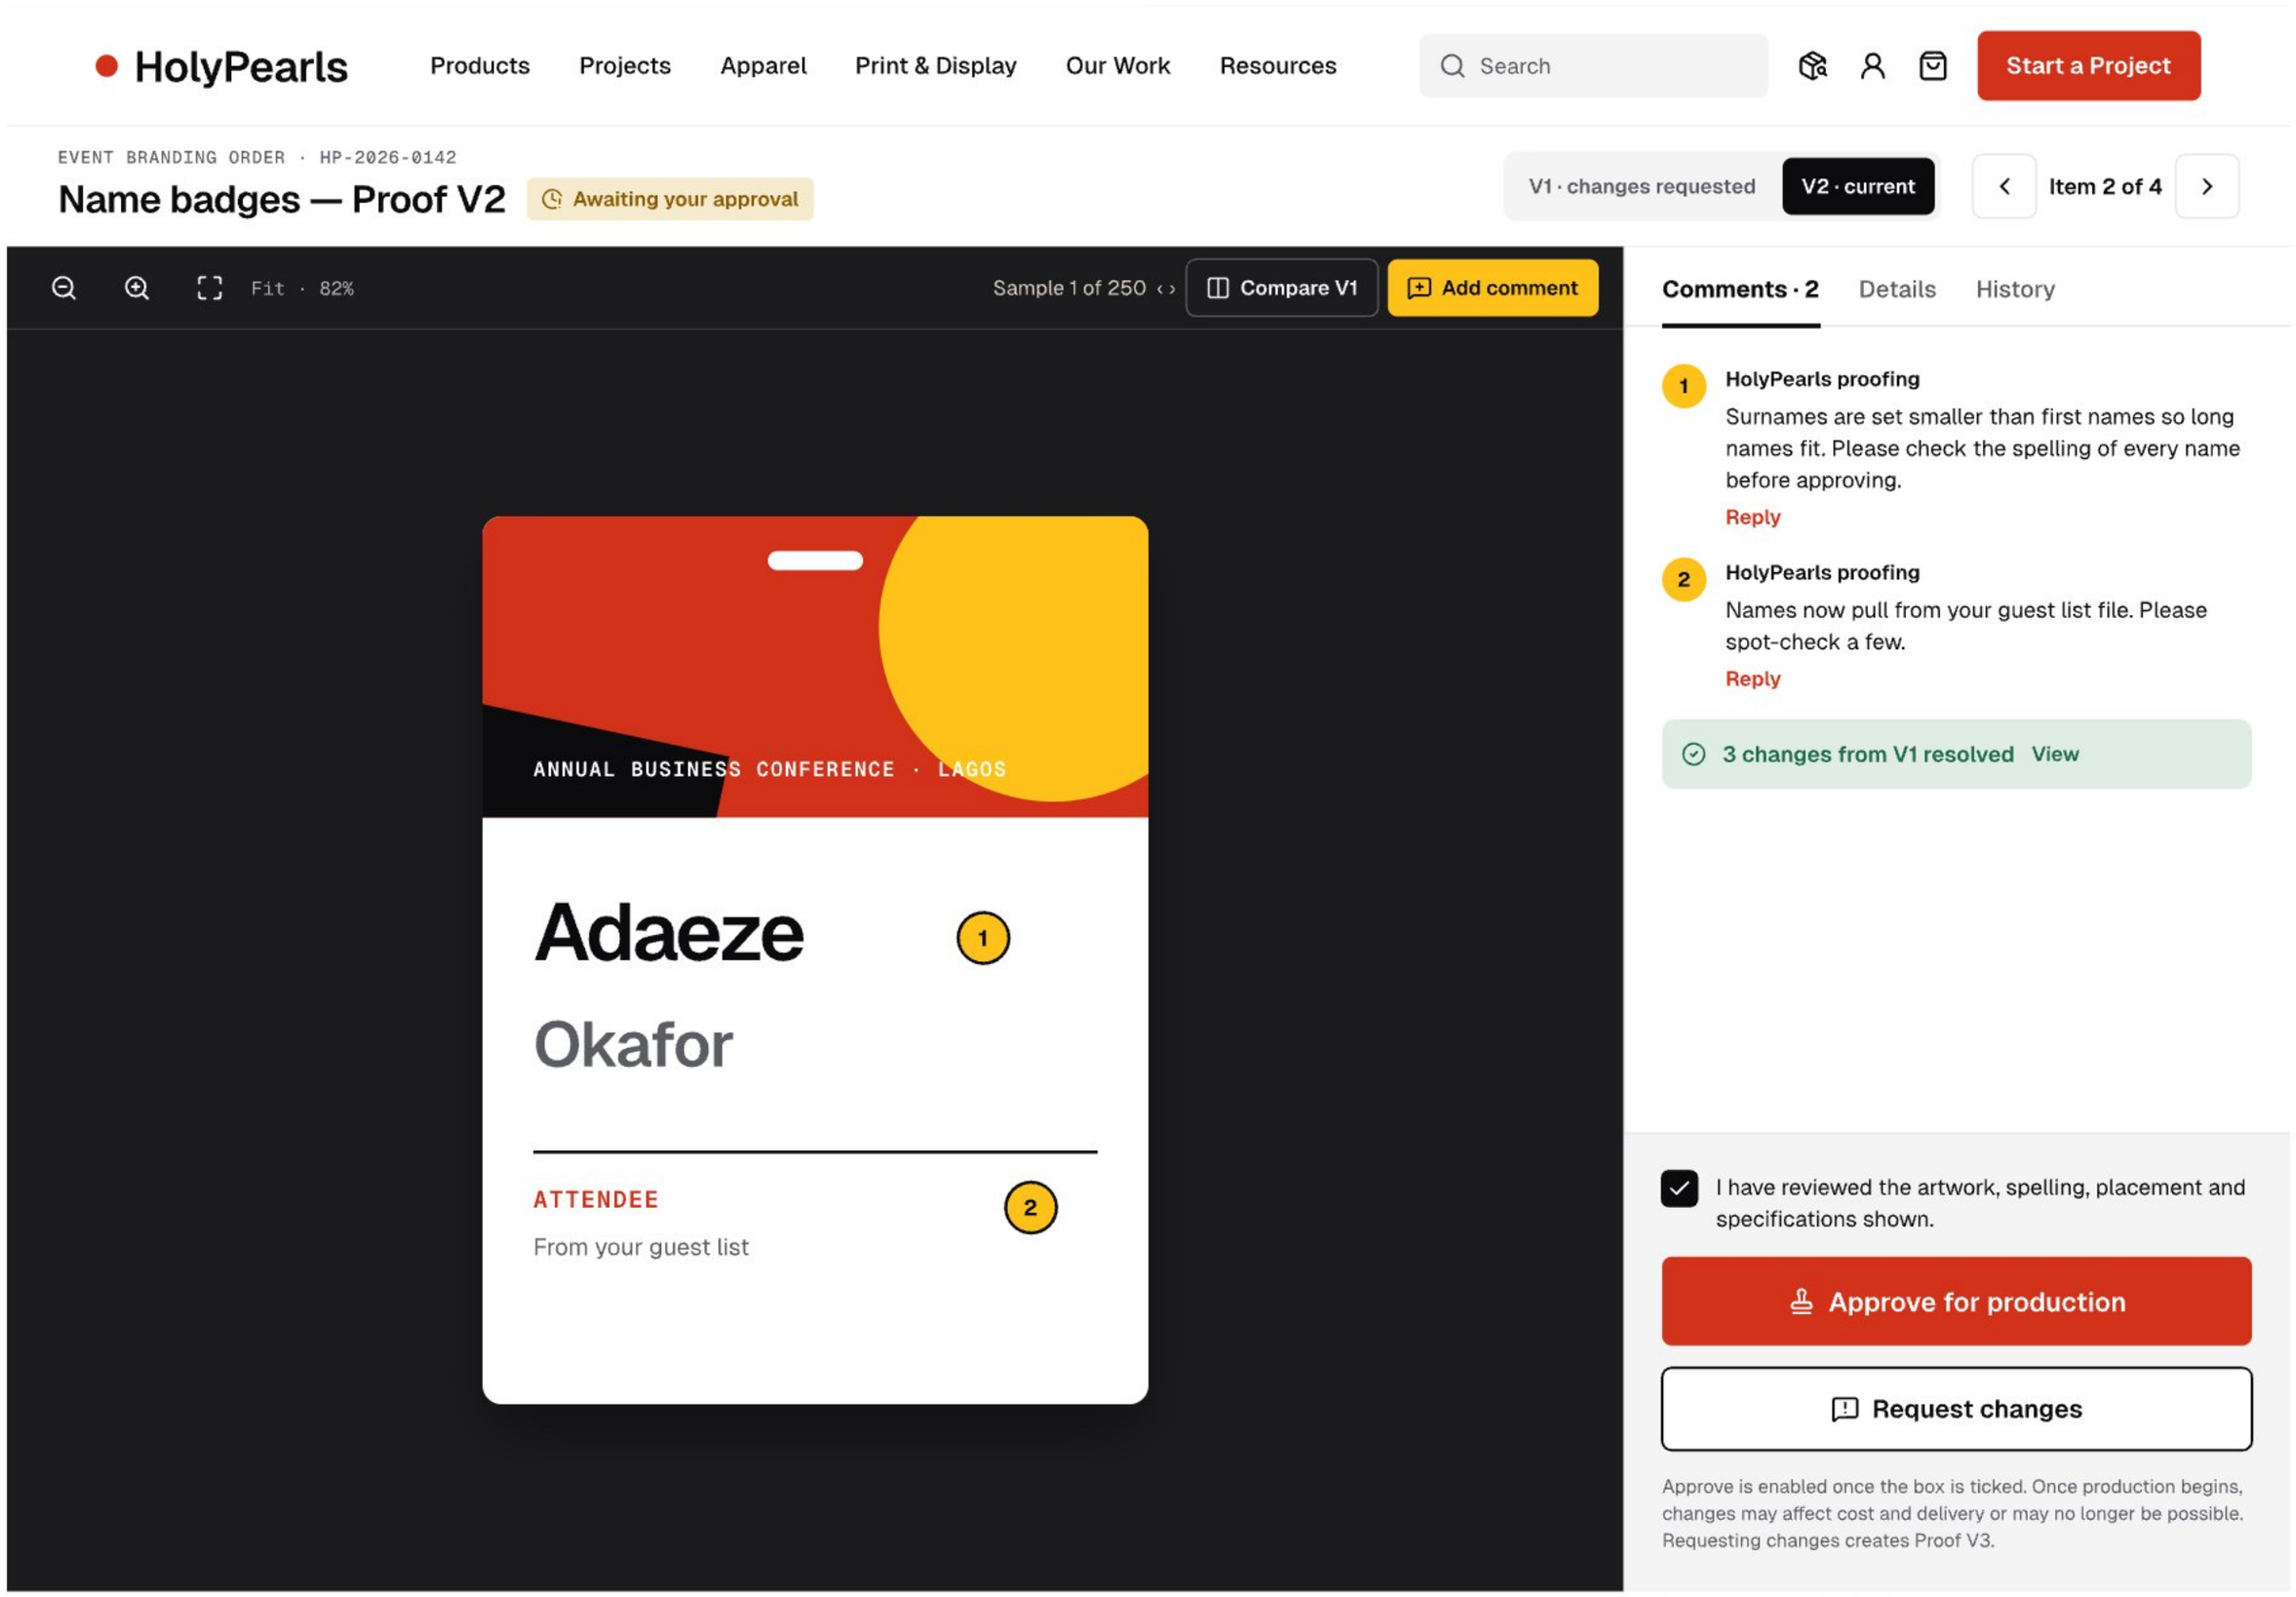

Payment terms · 60% deposit, 40% balance before dispatch (test rule) +

Changes after acceptance +

Cancellation and refunds +

Proof — desktop

Artwork first: the viewer takes two thirds of the screen on a neutral dark stage so colours read true. Comment pins are numbered and mirrored as text in the rail (never pin-only). Approve and Request changes sit together at the bottom of the rail with an explicit acknowledgement. References: Dropbox (file-first), Air (version + comments beside art), DocuSign (consequential decision).

Order Tracking — mobile

Attention first, then where things stand, then detail. Two required actions (badge proof, balance) sit above everything. Each item keeps its own state — release, dispatch and delivery are never flattened into one courier bar.

ORDER OF INFORMATION

1 · Needs you (only when true) → 2 · Where it stands, per item → 3 · Timeline → 4 · Payment → 5 · Shipments → 6 · Source records.

FROZEN STATES KEPT

Badge Proof V2 awaits approval. Backdrop stays READY — AWAITING RELEASE until the balance clears. Acceptance, deposit, balance and release are separate. Two shipments tracked independently.

STICKY UI

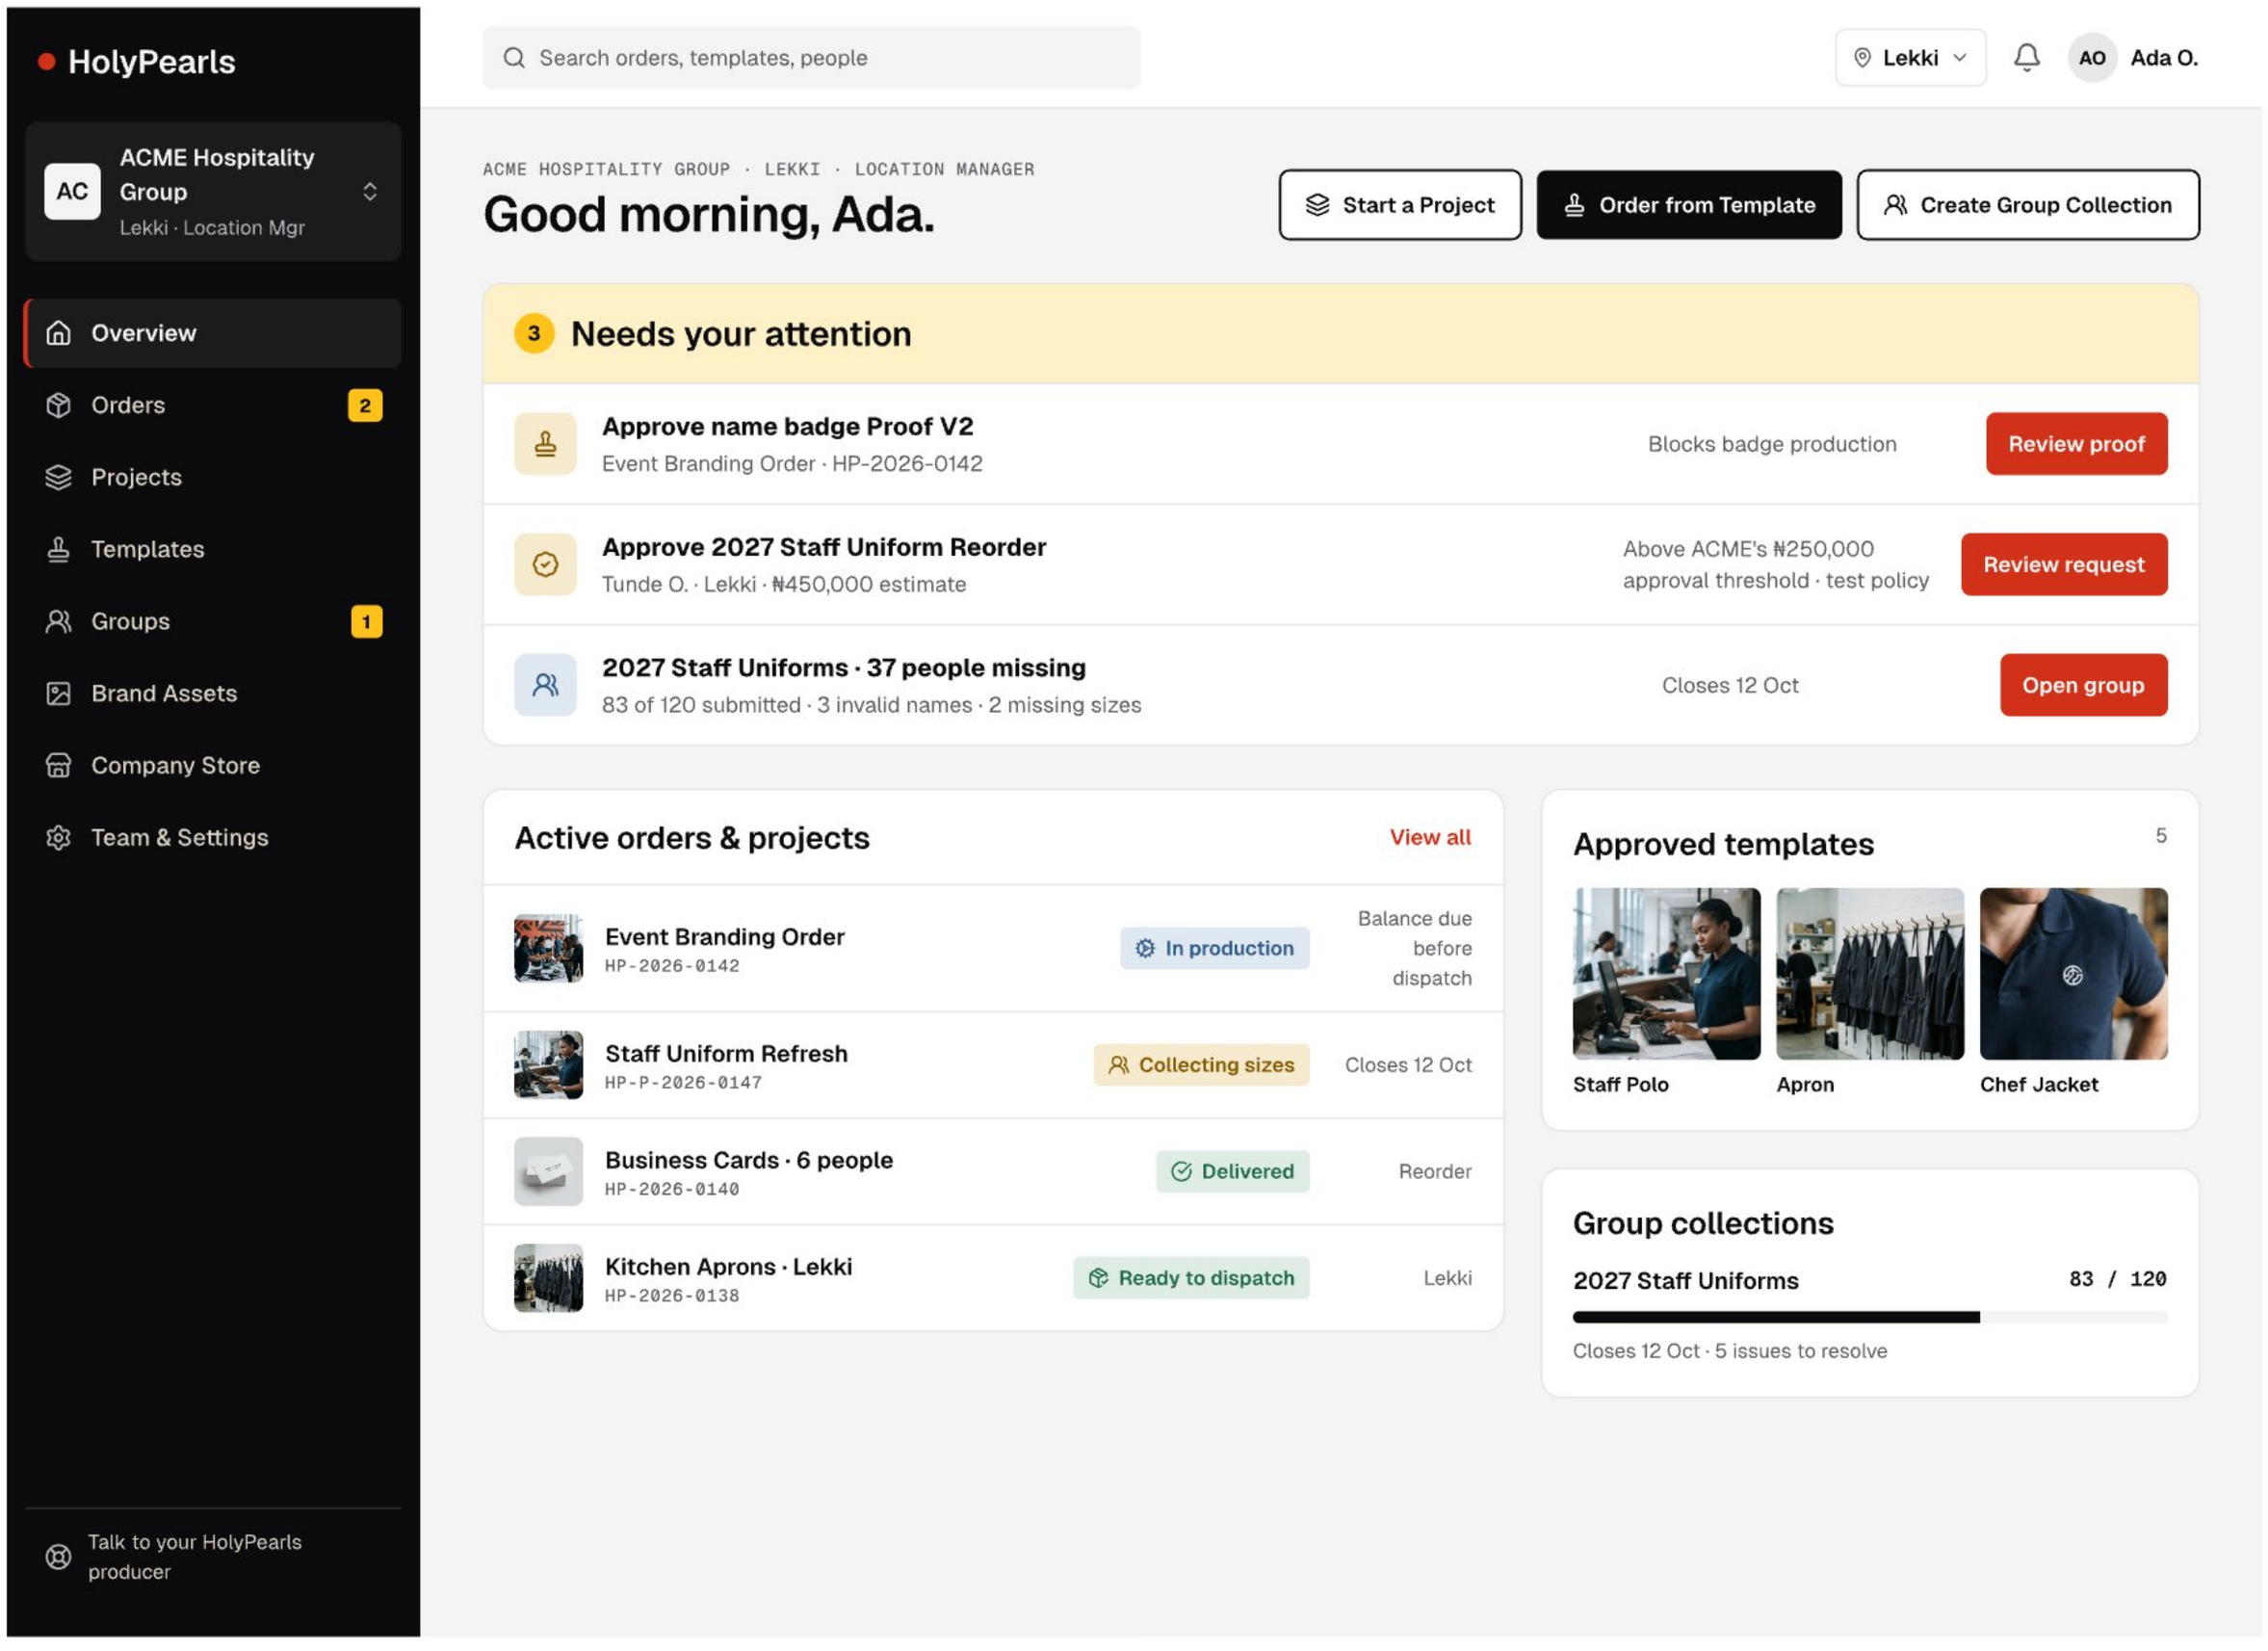

None by default. If the customer arrives from a 'pay balance' link, a sticky Pay bar appears until paid.

CALM

No progress percentages, no courier map. Colour + icon + words for every state; the item bar has a text legend.

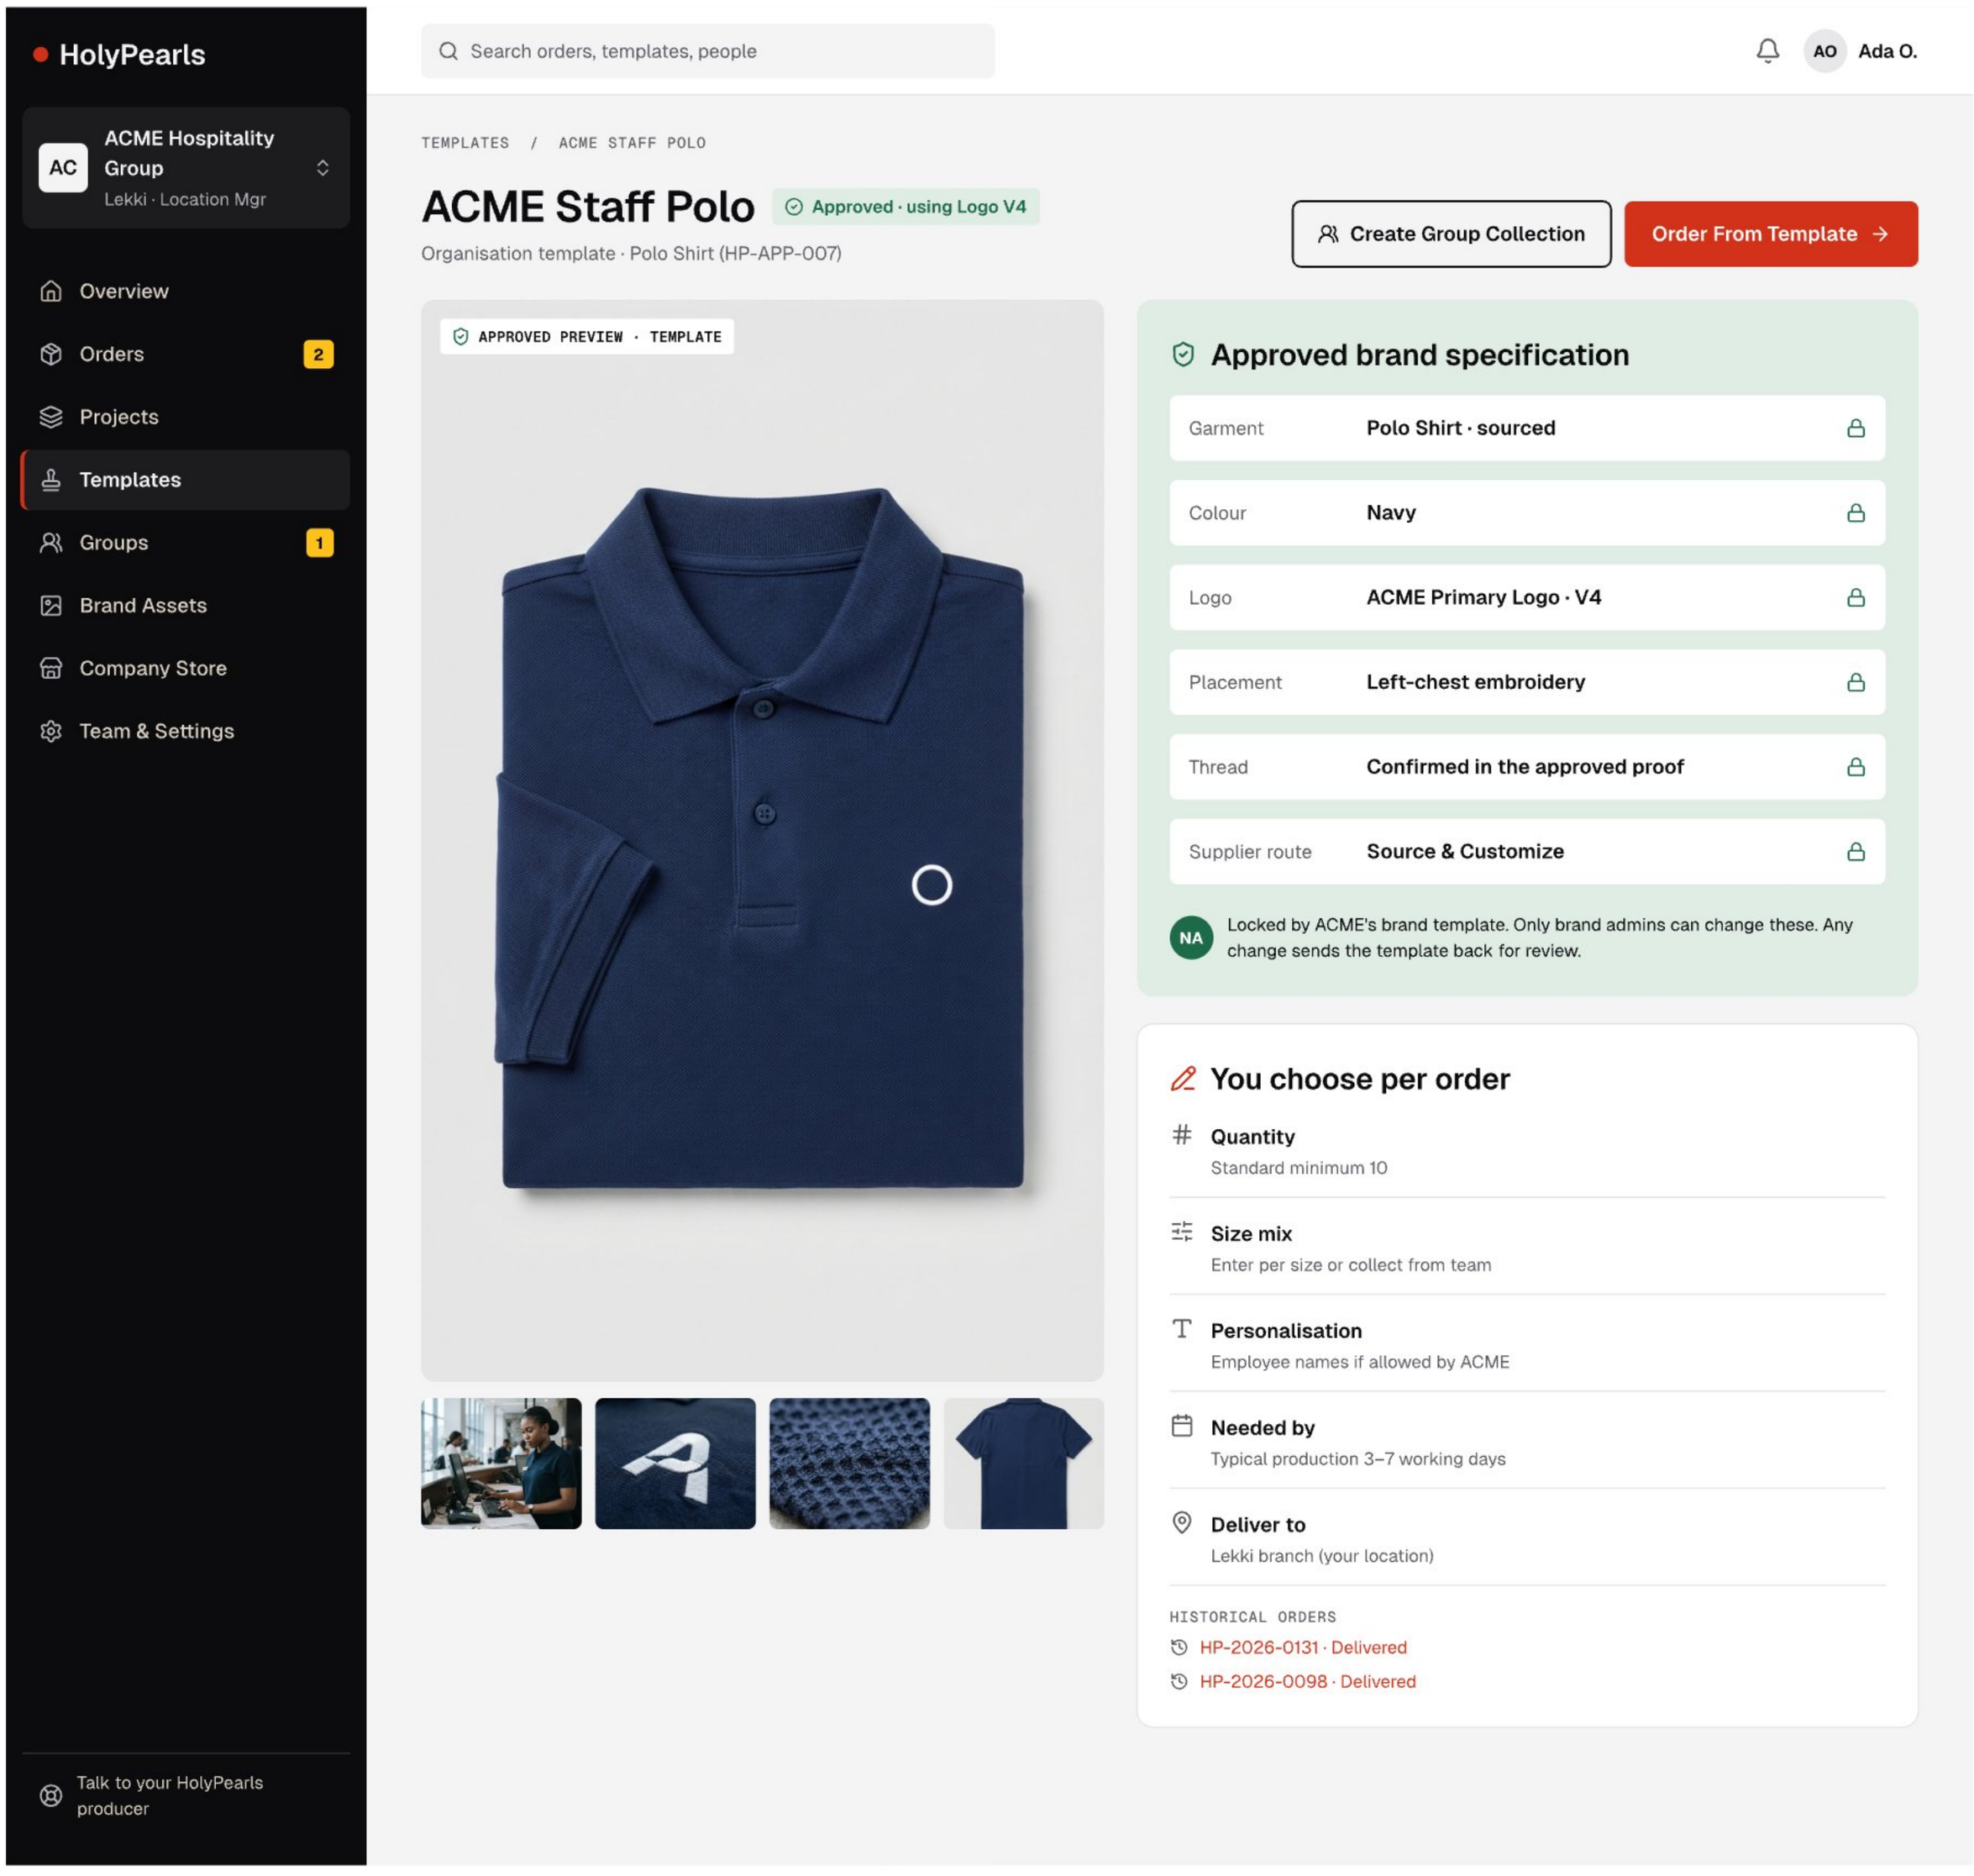

Workspace Overview — desktop

The same brand in operational mode: Geist UI weights only, 32px headings, tighter rhythm, Paper + Bone surfaces with the Ink sidebar. Needs Attention first (Stage 3.1F Part D), then quick actions, then active work. No KPI tiles, no charts — every number is something a person can act on.

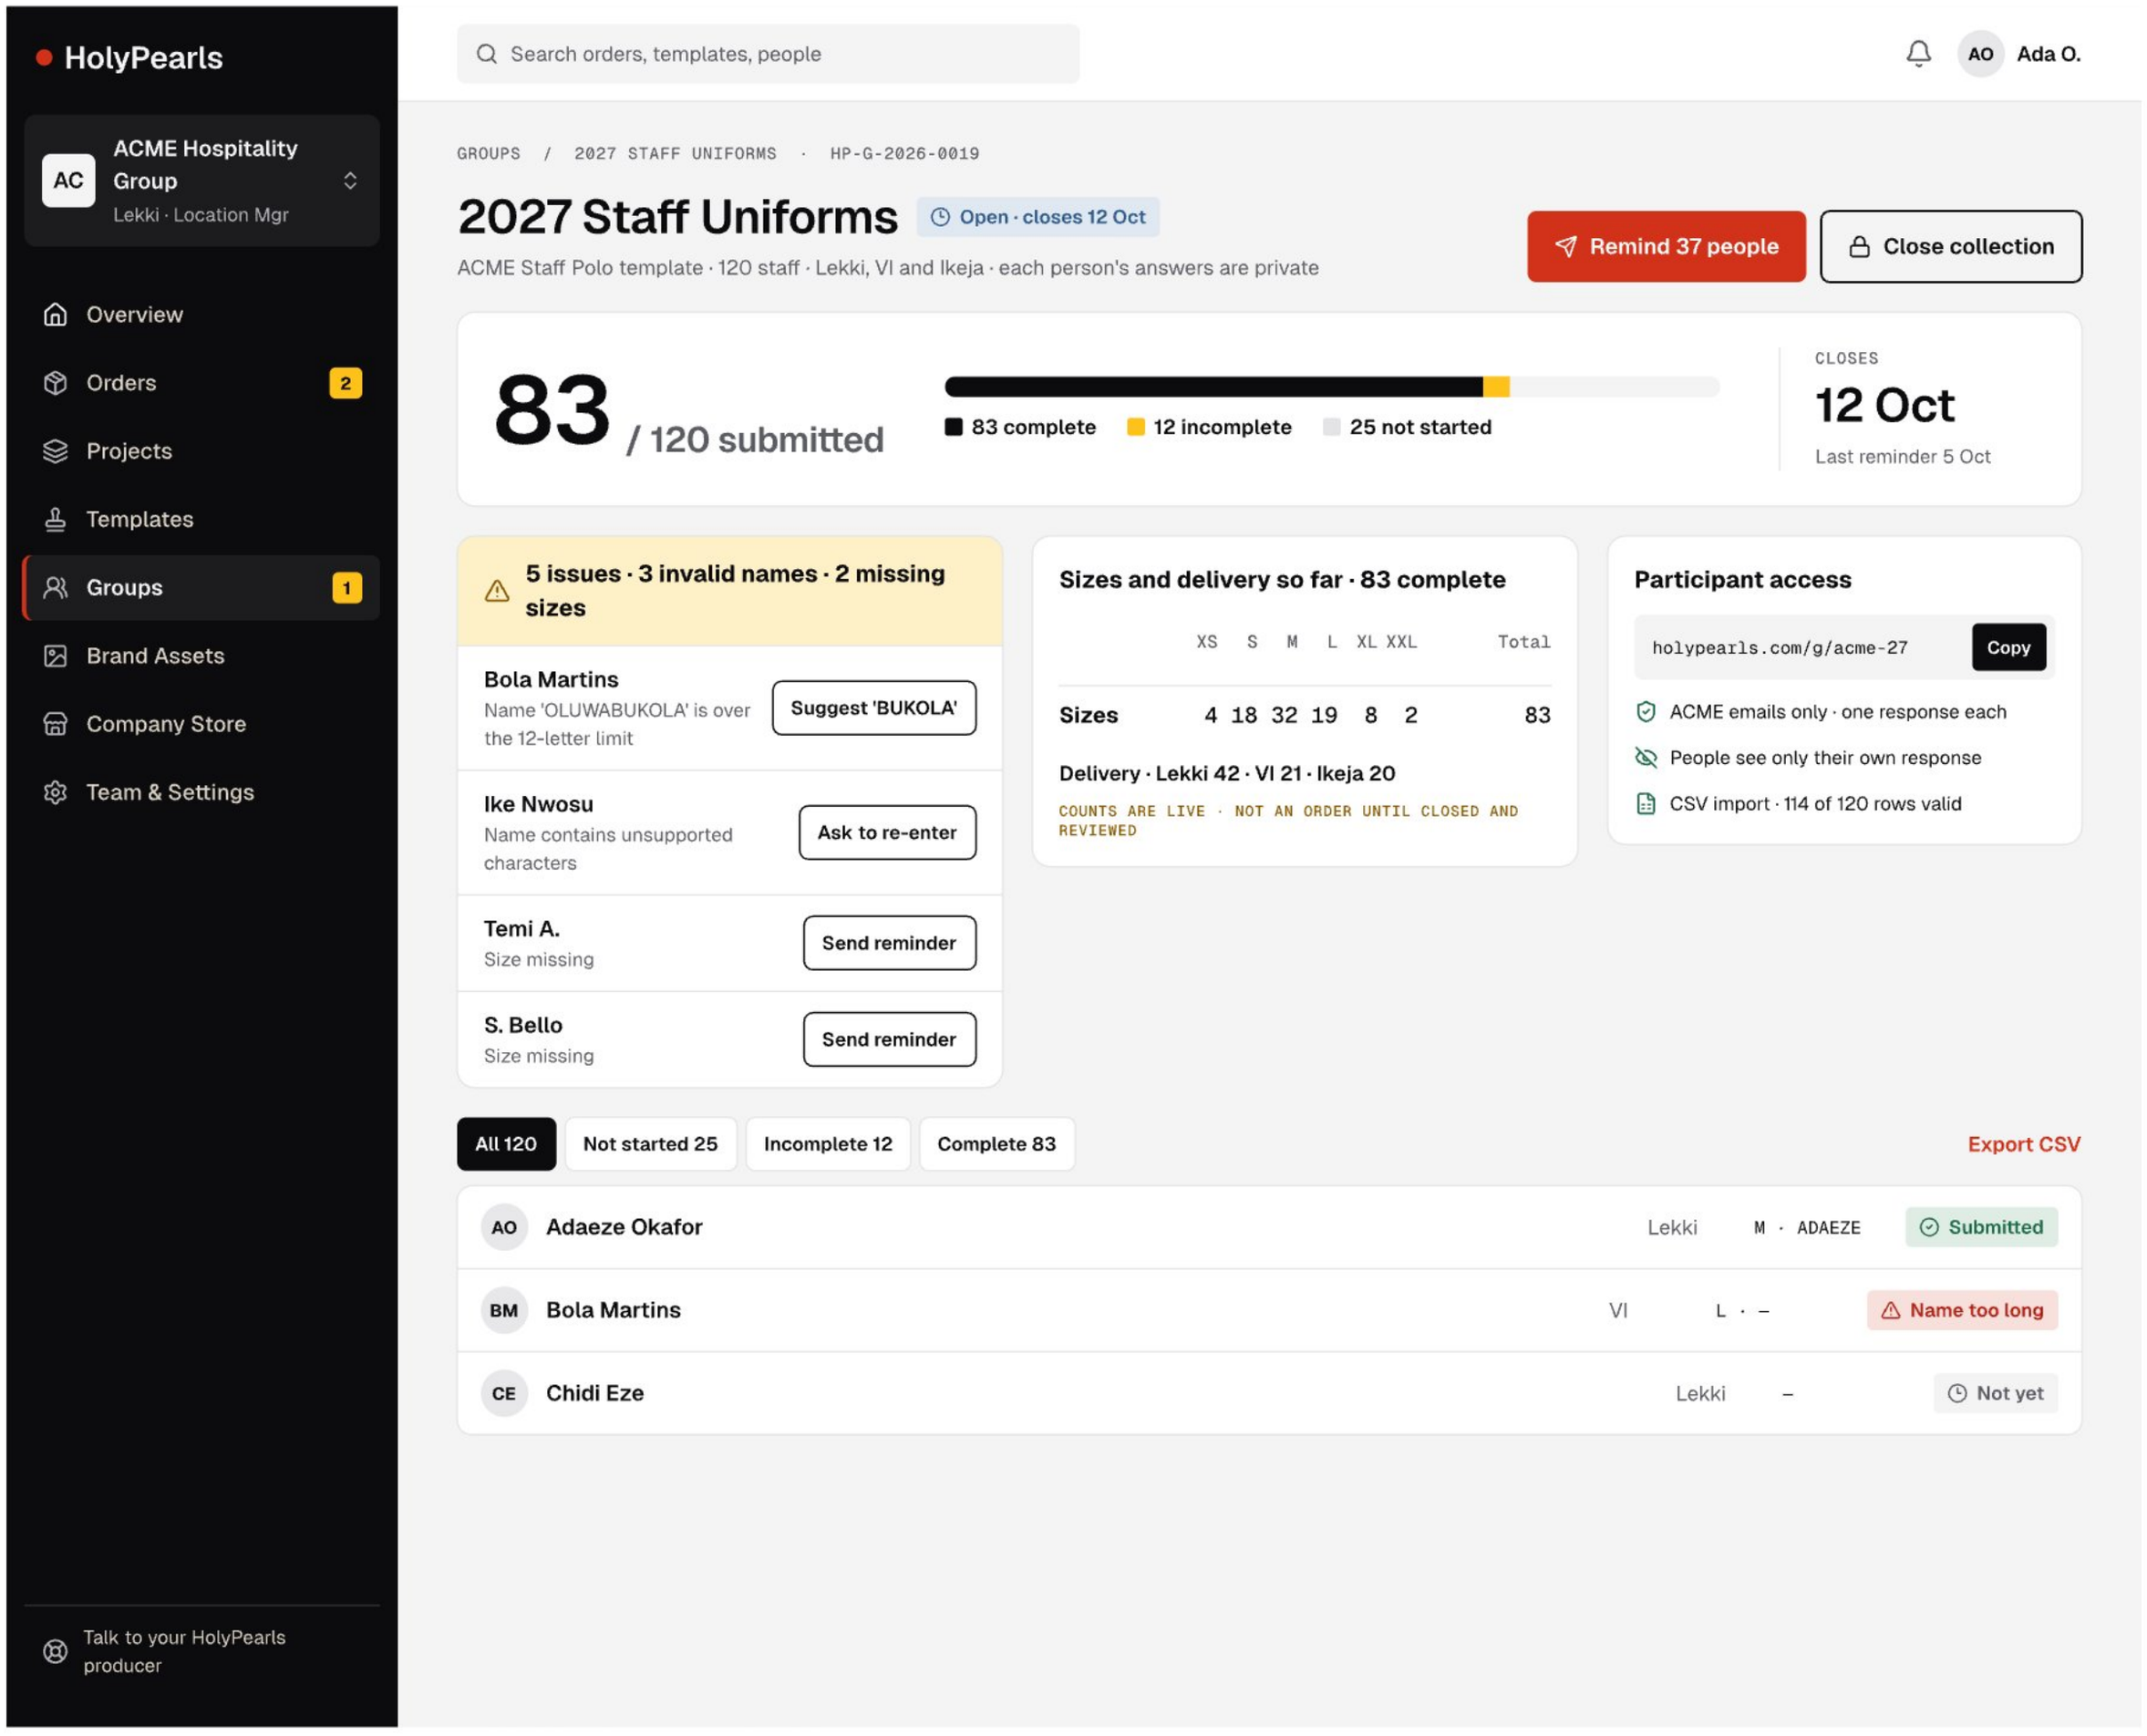

Template Detail — desktop

The product stays physical: a large approved preview. Locked brand decisions read 'Locked by ACME brand template' with the rule stated, so locks read as protection, not broken controls. Quantity, size mix, names, needed-by and delivery stay buyer-editable (Stage 3.1F Part I). Minimum and production time come from Stage 3.1C.

Group Organizer — desktop

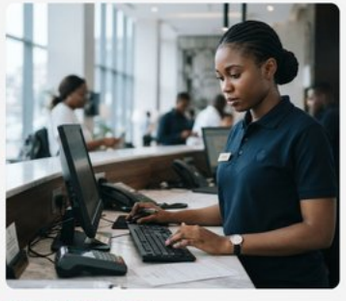

Readable density: one headline number that matters (83 / 120 submitted), then the issues to fix, then size and delivery totals. Values are the Stage 3.1F organizer fixture: 83 complete · 12 incomplete · 25 not started · XS4 S18 M32 L19 XL8 XXL2 · Lekki 42 VI 21 Ikeja 20 · 3 invalid names + 2 missing sizes · closes 12 Oct. Reminders and Close are the only primary actions.

Participant flow — mobile

Dramatically simpler than Workspace: no navigation, no peer data, one decision per screen, ACME's identity on top and HolyPearls quietly underneath. 56px size tiles, live name preview, branch delivery (Lekki · VI · Ikeja, no home address) and plain words about what a submission is — it joins the team collection; it is not an order.

You're in, Adaeze

Your size M polo with ADAEZE on it is part of ACME's 2027 team order for Lekki.

Change your answers until 12 Oct

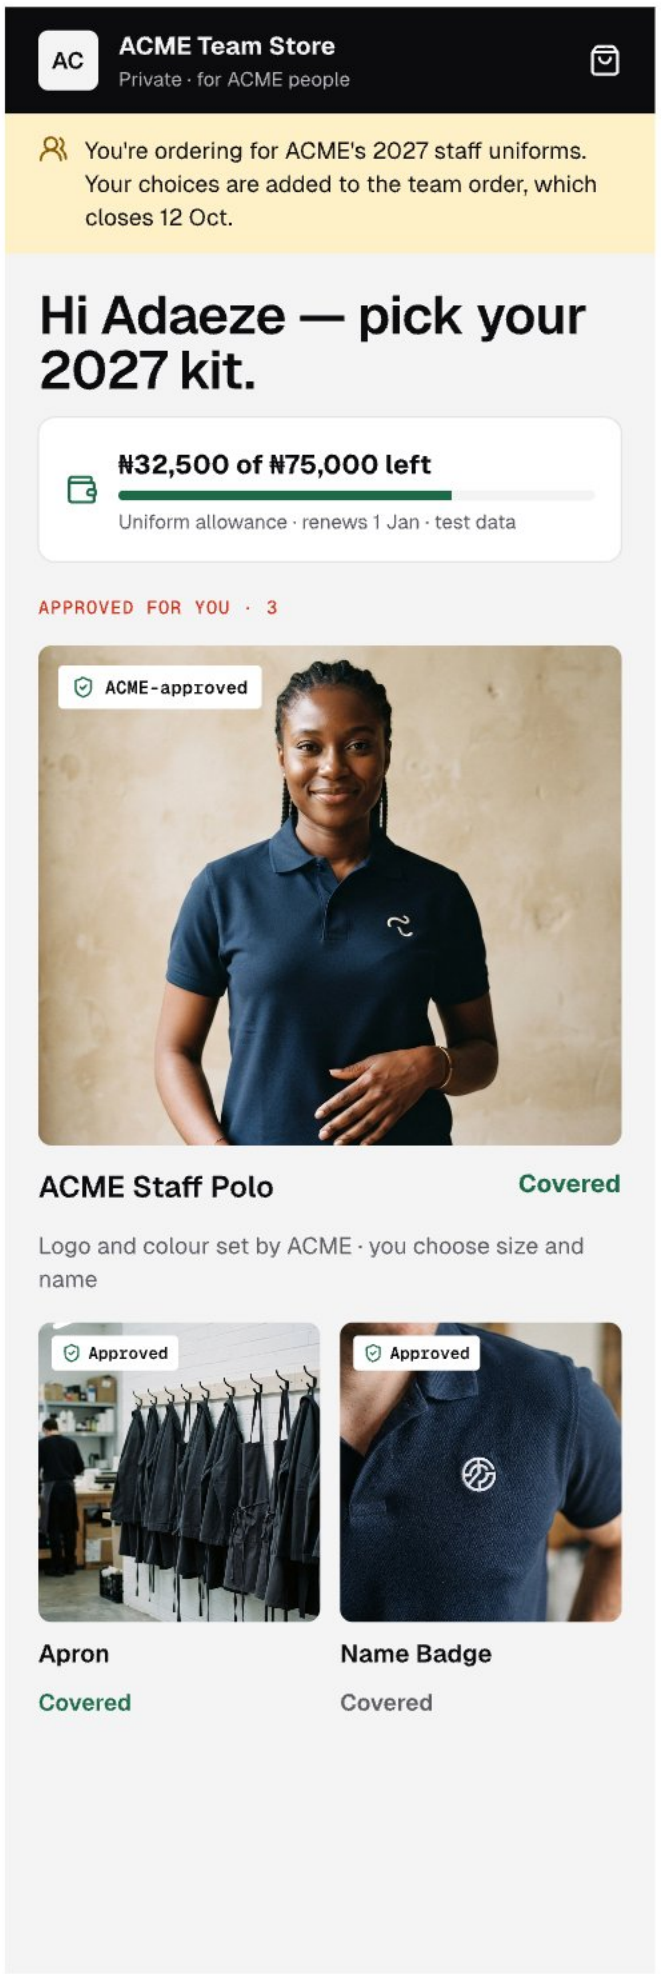

We've emailed you a copy

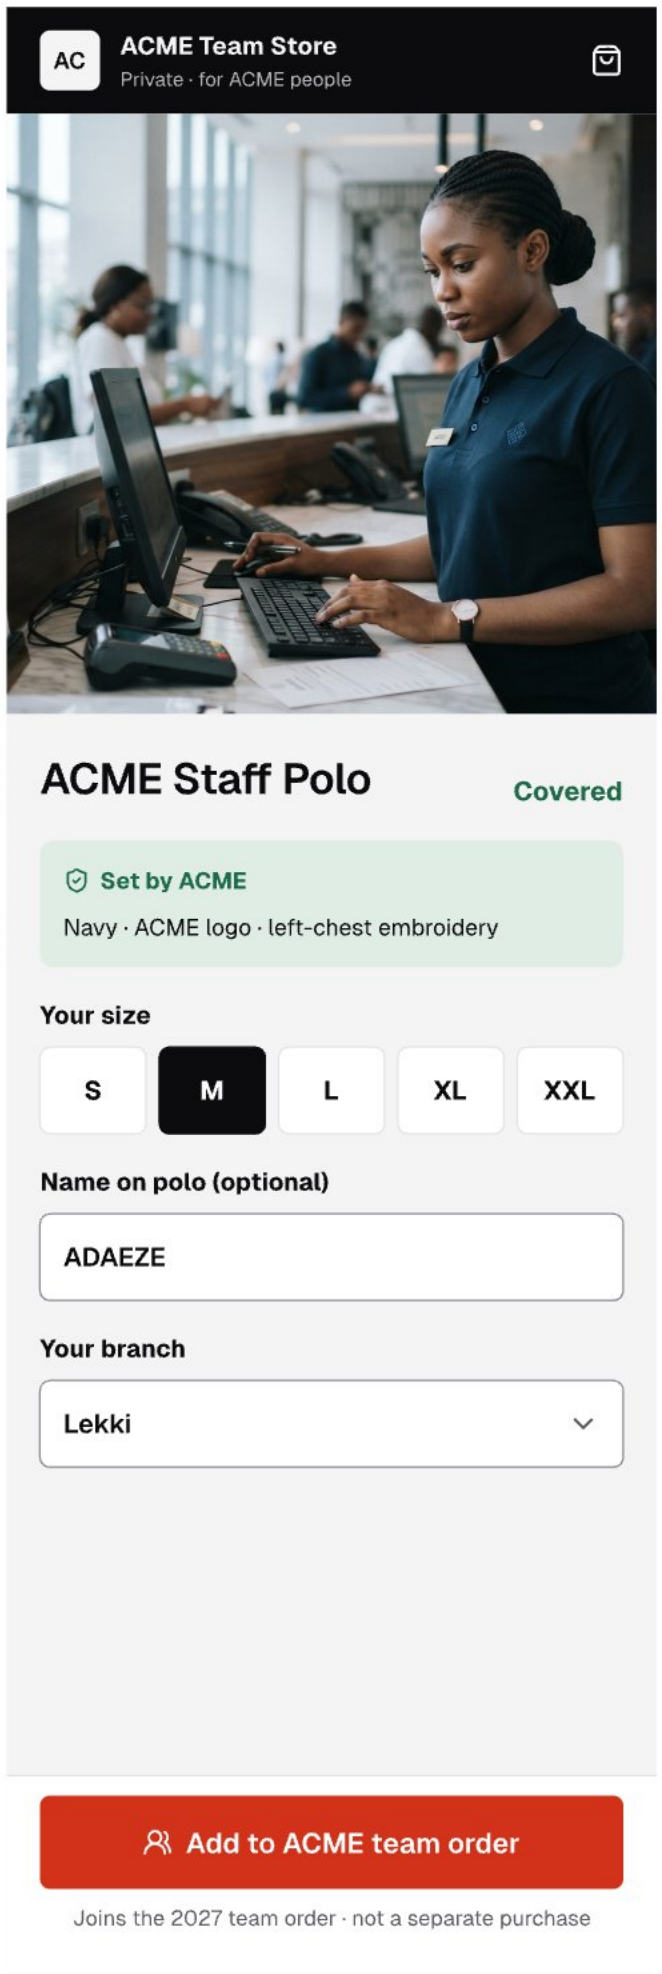

Delivered with your branch's team order

MADE BY HOLYPEARLS FOR ACME

Company Store — mobile

A small private shop that ACME approved. Store identity leads; the mode banner says plainly that picks join the 2027 team order (Group Collection mode — frozen J10). Locked choices carry a green shield and 'Set by ACME'; only size, name and branch are yours.

MODE LANGUAGE

Collection mode: 'Add to ACME team order' + 'joins the team order'. Individual mode (J09) would read 'Request this item' and route to an Individual Company Order Request.

LOCKED ≠ DISABLED

Locked choices are stated as facts in a green 'Set by ACME' block, not as greyed controls.

ALLOWANCE

Shown only when active. Items within allowance read 'Covered'.

STICKY

The add bar is sticky on the product sheet only.

Responsive notes

Desktop richness is never required for mobile comprehension. For every anchor: what changes structurally, what stays, what is removed or simplified, and where sticky UI appears.

ANCHOR	STRUCTURAL CHANGE	STAYS CONSISTENT	REMOVED / SIMPLIFIED	STICKY UI
01/02 Homepage	Filmstrip → poster + 4-frame swipe; outcome mosaic → swipe; index keeps numbers	17 frozen sections in order; search + Start a Project in first viewport	Category sub-copy; SMBD becomes one immersive image + text list; evidence becomes one dominant macro + capability note; footer → accordions	Header returns on scroll-up only
03 Product Directory	Filter rail → bottom-sheet drawer with result count; 2-col compact grid	Search first, family tabs, price-state dots + words	Feature card becomes full-width card; editorial interrupt stacks	Filter + Sort bar sticks under header
04 Apparel hub	Hero image moves above text; subcategories → 2×3 grid	Three routes, decoration comparison	Comparison table → stacked cards per method	None
05/06 Polo PDP	Gallery → full-bleed swipe; decision panel follows image	Price state, MOQ, lead time, route choice, one action	Thumbnails, material/process → accordions	Configure bar after in-page CTA leaves view
07 Business Cards	Inline configurator becomes stepped sections; paper tiles 2×2	Paper-first imagery, total + per-card	Paper band → horizontal swipe	Total + Add to bag sticky
08 Configurator	Preview on top (60% of viewport), controls in a sheet below	Preset placements only; live price	View toggle → segmented under preview	Back / Continue + price sticky
09 Start a Project	'Help me figure it out' first, describe box second	Something Else band	Small projects → 2-col	None
10 Recommendations	Summary rail → collapsible bottom bar	Recommended / Useful / Optional tiers, quantities	Feature card loses side column	Price-state bar sticky (Quote required — no project total)
11 Quote	Rail moves below line items; decision block repeats at end	Total, deposit, balance, validity, separate Accept vs pay	Plan timeline → vertical	Accept bar sticky once decision block leaves view
12 Proof	Artwork full-width; comments become a tab under it	Pins mirrored as text, version switch	Compare → toggle, not split	Approve / Request changes sticky
13 Tracking	Mobile is the anchor	Needs you → where it stands → timeline → payment → shipments	Desktop adds side column	Pay bar only when arriving from pay link
14 Workspace	Sidebar → bottom tab bar (5 items) + menu	Needs Attention first	Right column stacks below orders	Tab bar
15 Template	Preview → top; locked spec + editable stack	Locked-by-ACME block	Thumbs hidden	Order From Template sticky
16 Group Organizer	Status strip → headline number + bar; tables → cards	Issues before aggregates	Size + delivery totals → stacked rows	Remind / Close bar
17 Participant	Mobile-first; desktop centres the 390 column	One decision per screen	—	Primary action footer every screen
18 Company Store	Mobile-first; desktop 3-col product grid	Mode banner, 'Set by ACME', joins-team-order copy	—	Add to team order on product sheet

Accessibility notes

Designed in, not deferred. Targets: WCAG 2.2 AA, 16px body, 44px targets, visible focus, colour never alone.

AREA	RULE	WHERE IT SHOWS
Contrast	All text ≥ 4.5:1 (large ≥ 3:1). Ink/Paper 19.5, Graphite/Paper 6.6, Signal red/Paper 5.0, Paper on Signal red 5.0, Ink on Marigold 12.1. Marigold is never text on light.	03 colour system; all status chips
Focus	2px Ink ring + 2px Paper gap on every interactive element; never removed; visible on dark via Paper ring.	11 state matrix
Hover ↔ touch	Every hover reveal (alt image, arrow) has a visible or tap equivalent; nothing essential is hover-only.	Product cards, mega-menu → mobile menu
Selected states	Selected = 2px Ink border + filled ring/tag + label; not colour alone.	Choice cards, size tiles, routes, tabs
Errors	Message beside field with icon + recovery wording; summary at top on submit; focus moves to first error.	11 HP/Form/Error; participant name length
Status	Icon + word + colour; item bars have a text legend.	13 chips; 27 item bar; 30 status strip
Reduced motion	Production Reveal, section reveals, number rolls and loop video disabled; state changes remain.	09 motion
Type sizes	Body 16 min; support 14; mono meta 11–13 only for non-critical metadata. Display weight 600 with −4% tracking only at ≥ 36px; never below that size.	04 scale
Touch targets	44×44 minimum; commerce actions 52–56px; size tiles 52–72px.	Mobile anchors 16, 20, 27, 31, 32
Proof interaction	Pins are numbered and every comment is listed as text; approval requires a checkbox acknowledgement; keyboard: N/P to move pins.	26 Proof
File upload	Button alternative to drag-and-drop; progress announced; file type + size limits stated before upload; errors say how to fix.	11 upload; 22 configurator
Privacy	Participant screens show no peer data; organiser tables never show other orgs.	30, 31

Asset gap register

Revised with the production capability model. Core in-house: garment production / cut-and-sew and large-format printing. Everything else is offered and managed through HolyPearls with in-house status unconfirmed. Every production image on the board is TEMPORARY — no generated image becomes evidence because it looks believable.

CAPABILITY / ASSET · WHERE USED	IN-HOUSE STATUS	CURRENT ASSET · TEMPORARY?	REAL SHOOT REQUIRED	PARTNER ATTRIBUTION	PROHIBITED CLAIMS
Cut-and-sew / garment production · hero 01, SMBD, Apparel hub, directory promo	CONFIRMED IN-HOUSE (core)	Generated cutting + sewing · TEMPORARY	Yes — HolyPearls cutting, sewing, assembly with consenting staff	Not needed	Generated room, machine or operator presented as HolyPearls premises
Large-format printing · hero 02, evidence, Popular (backdrop, roll-up)	CONFIRMED IN-HOUSE (core)	Generated wide-format printer + output · TEMPORARY	Yes — HolyPearls printer, output and an installed backdrop	Not needed	Generated printer shown as HolyPearls equipment
Embroidery · hero 03, evidence macro, PDP, configurator	MANAGED · IN-HOUSE UNCONFIRMED	Generated satin-stitch macro · TEMPORARY	Finished embroidered HolyPearls order (outcome, not machine)	May be needed	'Our embroidery machines', stitch counts, test-sew claims
Screen printing · methods list, decoration table	MANAGED · IN-HOUSE UNCONFIRMED	Generated screen-print bench (library) · TEMPORARY	Finished screen-printed output	May be needed	'Printed in our screen-print department'
Heat transfer · methods list, decoration table	MANAGED · IN-HOUSE UNCONFIRMED	Generated heat press (library) · TEMPORARY	Finished transfer output	May be needed	In-house press equipment
Paper print + business cards · hero 04, Popular, Business Cards PDP	MANAGED · IN-HOUSE UNCONFIRMED	Generated plain matte cards (new) · TEMPORARY	Each approved stock (Standard, Premium 350gsm, Textured) in hand	May be needed	Weights other than Premium 350gsm; 'printed in-house'
Specialist finishing / letterpress · not offered on the board	MANAGED · IN-HOUSE UNCONFIRMED	Generated letterpress + painted-edge images · LIBRARY ONLY, removed from anchors	Only if operations confirms the finish	May be needed	'Our letterpress', painted edge, cotton stock as standard options
Packaging fabrication · families index, SMBD deliver	MANAGED · IN-HOUSE UNCONFIRMED	Generated mailer/packaging · TEMPORARY	Finished packaging from a real order	May be needed	'Our packaging line'
Promotional objects · families index, event useful additions	MANAGED · IN-HOUSE UNCONFIRMED	Generated merch · TEMPORARY	Finished items from a real order	May be needed	Owning object-production equipment
Signage fabrication + installation · outcomes, quote, tracking	MANAGED · IN-HOUSE UNCONFIRMED	Generated install crew + signage · TEMPORARY	A real installation with venue consent	May be needed	Venue, client or crew identity; 'our install team'
Quality Check · SMBD, tracking, trust	HOLYPEARLS PROCESS (Stage 3.1E milestone)	Generated QC (library) · TEMPORARY	Real QC step on a real order	Not needed	Invented QC checklists, pass rates
Packing + dispatch · SMBD deliver	HOLYPEARLS PROCESS	Generated packing · TEMPORARY	Real packing of a real order	Not needed	Delivery-time guarantees beyond seed ranges
Product hero photography · cards, PDPs, templates, store	n/a — sourced or made per route	Generated polo, tee, apron, cap · TEMPORARY	Per launch SKU (true colour, fit, construction)	Supplier imagery only with rights	Fabric composition, GSM or fit read off an image
Real client / project work · Our Work, project story	FUTURE INPUT	Generated team + signage, flagged CONCEPT REFERENCE	Client permission + real photography	Client credit per permission	Client names, logos, outcomes, testimonials
HolyPearls logo + wordmark · everywhere	BRAND INPUT REQUIRED	Provisional text wordmark	n/a	n/a	A drawn mark presented as final
Customer logo (ACME) · B2B anchors	TEST FIXTURE (Stage 3.1F)	Text mark 'AC'	n/a	n/a	Any real client identity

Design system changelog

Stage 4.1 · Claude run · 26 Sep 2026 — plus correction & art-direction pass, same day.

CORRECTION PASS · 26 SEP 2026

· Operational data re-sourced: every price, MOQ, lead time, spec and count now traces to Stage 3.1C/3.1D/3.1E/3.1F or the Stage 1.4 seed — see review MD provenance table

· Removed: invented fabric/GSM specs, paper stocks, letterpress/painted-edge options, tier prices, VAT claims, '6 production methods' stat, capability counts, dates, venue

· Production capability model: core in-house (cut-and-sew, large format) vs managed/unconfirmed; copy and asset register rewritten to match

· Typography: Geist 600 display, Geist UI, Geist Mono meta (Signal direction, 26 Sep 2026); type specimen and token table updated

· Homepage recomposed into six modes; Paper base, larger Ink moments, dominant photography; outcomes, SMBD, evidence, work, solutions de-carded

· Frozen corrections: configurator 6 stable groups (3.1C), builder 6 stable steps (3.1D), tracking states per 3.1E (nothing dispatched before balance), group fixture per 3.1F

ADDED

· hp-* token set (colour, type, radius) — provisional

· Signal direction: Geist 600 display + Geist UI + Geist Mono meta on a white/cool-neutral base (Instrument Serif and the warm palette retired 26 Sep 2026)

· HP/* layout-based, token-bound components: nav, footer, actions, forms, commerce, status, transaction, B2B, project

· Production Ticket, Production Reveal, HP/Graphic/* production graphic language

· Generated image library (28 temporary references)

· 18 anchors on the new system

UNCHANGED FROM FROZEN STAGE 3

· All information architecture, section order and journeys (J01–J16)

· State vocabulary: price states, proof/quote versions, READY — AWAITING RELEASE, acceptance ≠ payment ≠ release

· Group submission ≠ order; Company Store routing modes

· Sponsor welcome kit outside Quote V2

CLARIFIED IN HIGH FIDELITY (no logic change)

· Decoration comparison table on Apparel hub (content, not flow)

· Quote 'What changed from V1' banner surfaces existing version history

· Order tracking item bar with text legend

· Template lock shown as signed approval (existing approver data)

SUPERSEDES

· The earlier Stage 4.1 board (frame 'STAGE 4.1 — HIGH-FIDELITY VISUAL SYSTEM + 18 ANCHORS') remains in the file for comparison; hf-* variables and HF/* components are not used by this board.

Generated product catalogue set · temporary until real photography
